HT Series speaker is a cost-effective product, with high quality driver unit. The carefully designed crossover network makes the characteristic of the speaker to be extreme. The speaker component is built with aluminum flat voice coil, with gapless heat conduction between the coil, to reach faster and better heat dissipation, so to protect and improve the performance of the unit effectively. HT Series speaker gets rid of the disadvantages of common professional speaker which is one-sided pursuit of high SPL while ignores the sound balance, but focuses on doing balance adjustment on the frequency response curve of sound, so to get more prominent of overall style of music. With smooth and wide range, it can meet more requirements in different functions. It is very classic in the application of top entertainment club of luxury business KTV.
